

PERSONALIZED
MEDICINE COALITION

Membership Application

ABOUT PMC

An educational and advocacy organization, PMC promotes personalized medicine

by addressing regulatory, reimbursement, privacy, ethical and educational issues critical to the field. Based on the diversity of its membership, PMC has become the preeminent voice shaping policy about and increasing investment in personalized medicine.

The Coalition:

- **Provides opinion leadership** on policy issues that affect personalized medicine;
- **Helps educate policymakers** in government, industry and academia about the benefits of personalized medicine; and
- **Serves as a forum** for identifying and informing others of policies that could advance or impede the development of personalized medicine.

The Personalized Medicine Coalition (PMC), representing innovators, scientists, patients, providers and payers, promotes the understanding and adoption of personalized medicine concepts, services and products to benefit patients and the health system.

BENEFITS OF MEMBERSHIP

By joining PMC, organizations gain an opportunity to shape the future of the field by:

- **Having a voice in creating a favorable policy environment** for personalized medicine;
- **Forging relationships** with other stakeholders in personalized medicine; and
- **Sharing best practices**
 - Educational resources
 - Forums for debate and consensus driven solutions
 - Networking within and across domains

Members also learn about the latest trends and developments in science, policy and business through forums, newsletters and member-only updates.

Personalized medicine is transforming the practice of medicine, and the Personalized Medicine Coalition is playing a critical role in bringing together all of the stakeholders to help make that happen.

Raju Kucherlapati, Ph.D.
Paul C. Cabot Professor of Genetics
Professor of Medicine, Harvard Medical School

The Role of the Personalized Medicine Coalition

Paradigm shifts, especially in medicine, do not happen just because the science or new technologies suggest they should. Based on that assumption, at the end of 2004, the Personalized Medicine Coalition (PMC) was launched by some 20 institutions, which spanned the health care ecosystem. They included the pharmaceutical, biotechnology, and diagnostic industries, tool manufacturers, academic health centers, venture capitalists, insurance companies, and patient advocates.

Over the past decade, with the growth of personalized medicine, the Coalition has expanded to over 250 institutions across the health care spectrum. Along with raising personalized medicine's profile, PMC's mission is to advocate for changes that will increase investment in personalized medicine and facilitate its adoption so that both patients and the health system will benefit from improved clinical care and increased overall value.

What is Personalized Medicine?

Personalized medicine is an evolving field in which physicians use diagnostic tests to determine which medical treatments will work best for each patient. By combining the data from those tests with an individual's medical history, circumstances, and values, health care providers can develop targeted treatment and prevention plans.

PMC MEMBERSHIP

A 501(c)3 organization, the Personalized Medicine Coalition is an independent, non-partisan education and advocacy organization whose members are committed to science-driven evidence-based health care. A membership committee reviews all applications.
